PATENT COOPERATION TREATY

PCT

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (Chapter I of the Patent Cooperation Treaty)

(PCT Rule 44bis)

Applicant's or agent's file reference FE241483	FOR FURTHER ACTION	See item 4 below	
International application No. PCT/KR2004/001851	International filing date (day/month/year) 23 July 2004 (23.07.2004)	Priority date (day/month/year) 24 July 2003 (24.07.2003)	
International Patent Classification (8th See relevant information in Form F	edition unless older edition indicated) PCT/ISA/237		
Applicant UTStarcom Korea Limited			

1.	This international preliminary re International Searching Authority	port on patentability (Chapter I) is issued by the International Bureau on behalf of the y under Rule 44 bis.1(a).
2.	This REPORT consists of a total	of 4 sheets, including this cover sheet.
	In the attached sheets, any refere to the international preliminary re	ence to the written opinion of the International Searching Authority should be read as a reference eport on patentability (Chapter I) instead.
3.	This report contains indications i	relating to the following items:
	Box No. I	Basis of the report
	Box No. Π	Priority
	Box No. III	Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
	Box No. IV	Lack of unity of invention
	Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
	Box No. VI	Certain documents cited
	Box No. VII	Certain defects in the international application
	Box No. VIII	Certain observations on the international application
4.	The International Bureau will conot, except where the applicant rdate (Rule 44bis .2).	ommunicate this report to designated Offices in accordance with Rules 44bis.3(c) and 93bis.1 but makes an express request under Article 23(2), before the expiration of 30 months from the priority

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/KR2004/001851

Box No. 1 Basis of this opinion
1. With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.
This opinion has been established on the basis of a translation from the original language into the following language, which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).
 With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
a. type of material
a sequence listing
table(s) related to the sequence listing
b. format of material
in wirtten format in computer readable form
L. J. In computer readable form
c. time of filing/furnishing
contained in the international application as filed.
filed together with the international application in computer readable form.
furnished subsequently to this Authority for the purposes of search.
In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additioanl copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/KR2004/001851

Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Novelty (N)	Claims 1 - 13	YES
	Claims NONE	МО
Inventive step (IS)	Claims NONE	YES
	Claims 1 - 13	NO
Industrial applicability (IA)	Claims 1 - 13	YES
	Claims NONE	NO

2. Citations and explanations:

Reference is made to the following document:

D1: JP 07-274240 (20 October 1995)

D1, which is considered to represent the closest prior art, discloses a communication system in which a host computer side recognizes where a portable terminal equipment exists. The portable terminal equipment includes a radio transceiver for communicating with a radio master station which is connected to the host computer, a receiver for receiving signals from beacon oscillators. A position signal of each beacon oscillator received by the receiver and an identification signal of the portable terminal equipment are transmitted to the host computer via the radio transceiver and the radio master station (D1, abstract). The host computer recognizes the position of the portable terminal equipment by the transmitted signals (D1, paragraph [0009]).

The subject matter of claim 1 differs from that of D1 in that the system of said claim uses a pilot strength measurement message (PSMM) signal. However, it is obvious to a person skilled in the communication system to use a PSMM signal. Therefore, claim 1 is considered to lack an inventive step.

The additional features of dependant claims 2-8 are simple design details which are well known to a person skilled in the CDMA communication system. Therefore, claims 2-8 are considered to lack an inventive step.

Claim 9 relates to a method using the system of claim 1. Therefore, claim 9 is considered to lack an inventive step (see claim 1).

The additional features of dependant claims 10-13 are simple design details which are well known to a person skilled in the CDMA communication system. Therefore, claims 10-13 are considered to lack an inventive step.
